About Me

Cyber Security Analyst with 3.5 years of experience designing, implementing, and troubleshooting hardware, network and security testing. Collaborated with many IT infrastructure and application development staff members to identify, prioritize, and manage the remediation of vulnerabilities.

Experience

TATA Consultancy Services

2020 - Present

Cyber Security Analyst

- Analysing the vulnerability reports from the Responsible Disclosure bug bounty program.
- Reproduce vulnerabilities through automated and manual assessments and promote quick remediation.
- Experience with Postman Burp Suite and Zap tools.
- Managing and providing L2 support on DLP.
- Experience tuning Symantec DLP to reduce false positives and improve detection rates.
- Good knowledge of DLP versions, patching, and other initiatives of DLP tools.
- Responsible for the configuration and administration of DLP.
- Responding to alerts from the various monitoring and detection systems in CASB.
- Experience with the Microsoft Defender tools.
- Prevent or detect spam, phishing, malware, bulk mail, and spoof intelligence.
- Detect true positives, false positives, and false negatives that are reported by admin submissions and user-reported emails.
- Extensive experience in security technologies such as IDS/IPS and sandboxing.
- Preparing and submitting weekly and monthly reports to clients.
- Utilized tools such as Archer to support incident management, and to view status status, and requests.
- Utilized project and task management tools such as JIRA to keep track of status.
- Utilized analytical tools such as Power BI to view the interactive personalized dashboard and real-time information.
- Trained associates in proper procedures.
- Worked on cloud migration from on-premises to Azure.
- Experience in effectively coordinating and handling business partners and clients.
- Experience in network design using Cisco Packet Tracer.
- Knowledge of LAN, WAN, TCP/IP networking, and routing protocols (RIP, EIGRP, and OSPF).
